10,000 latrines

120,000 people exposed to health promotion

## By using the A.H.E.A.D METHODOLOGY of COMMUNITY HEALTH CLUBS

#### In each of the IDP 15 camps:

- 50% households within a Community Health Club
- 50% of Health Club members with household latrine
- Each latrine shared by 2 households

NEEDED:

5-20 health clubs per IDP Camps

One trainer for five health clubs

## An NGO was formed to implement this programme Health Integrated Development Organisation

25 clinicians were trained in PHAST participatory methodology in a 5 day workshop, and they were posted to 15 IDP camps

### **Adapting Training Materials (MoH, WaterAid, AHEAD)**

A tool kit of visual aids was produced for trainers for each topic

In each of 15 camp a Sanitation CBO was formed.

Women trained to produce cement sanplats

Sanplats were brought by CARE for 2,000/-

Donated to those CHC h/holds who had dug pits

18,844 members were registered and given membership cards

Weekly health sessions were held for each club in 15 camps

Cards were signed each time a member attended a session

61% (3,372) health club members built drying racks in 4 months

Hand washing facilities (Tippy taps) were built near each latrine

2,000 Poly sanplats installed + 8,000 cement sanplats
